PROFILE

Curiosity-driven recent graduate in Computing and Software Systems with hands-on experience designing, building, testing, and maintaining production software. Seeking to translate business requirements into practical and reliable software that have real impact on the community.

EDUCATION

Bachelor of Science, The University of Melbourne Jul, 2023 - Jul, 2026

- Bachelor of Science in **Computing and Software System**
- **Relevant Course Work**: Software Modelling and Design, Algorithms and Data Structure, Object-Oriented Software Development, Computer Systems, Database System, Elements of Data Processing, Models of Computation, Information Security, Artificial Intelligence, Machine Learning
- **Average WAM**: 80/100

RELEVANT EXPERIENCE

IT/Tech Specialist Intern Apr, 2026 - Jul, 2026
Bookstore + Studio at TERRAIN (Startup), Melbourne

- Co-designed and launched a membership program end-to-end with the founder, building the sign-up webpage (React/HTML/CSS) and constructing a no-code Airtable backend to manage member records, track membership tiers and payments, and automate welcome and event notification email workflows
- Developed and maintained the organisation's website using React, HTML, CSS, and JavaScript, with version control via GitHub and deployment hosted on Firebase
- Managed and customised the Shopify online storefront using Liquid templating, ensuring consistent product presentation and a smooth customer purchasing experience; resolved layout and rendering bugs and optimised page load speed
- Provided front-of-house support two days per week, including greeting customers, processing book sales, and checking in members for pre-booked studio desks

Scrum Master, Full Stack Developer Aug, 2025 - Nov, 2025
Volunteer IT Team, TERRAIN & University of Melbourne, Melbourne

- Facilitated over 20 daily stand-ups and 3 Sprint Planning sessions, ensuring adherence to time-box and maintaining a clear focus on the Sprint Goal for a 5-member development team
- Co-facilitated Sprint Reviews with the Product Owner, coordinating presentations for stakeholders and clearly communicating Sprint results and progress toward the Product Goal
- Facilitated CI/CD testing, staging, and deployment of TERRAIN main website through a Firebase service

PROJECT WORK

Automatic Desk Booking System - TERRAIN Jun, 2026 - now

- Designed and built a full-stack desk-booking system (FastAPI, PostgreSQL/Supabase, React), self-hosted for live use by a startup team as a replacement for Airtable-based scheduling
- Implemented a gap-maximisation scheduling algorithm across 8 desks with real-time clash detection, plus a waitlist system combining membership-tier weighting, preference bonuses, and submission-time priority
- Designed and implemented a three-layer automated test suite using pytest, suite of 70+ tests caught multiple pre-rollout bugs and is integrated into a GitHub Actions CI pipeline that runs on every push

WalletTracker - Discord Spending Tracker Bot Apr, 2026 - now

- Built a Discord bot in Python using discord.py that allows users to log real-time spending entries, set budgets, and receive automated financial summaries directly in Discord
- Designed and implemented a SQLite database schema to persist spending entries, user budgets, time zones, and server configurations across multiple Discord servers
- Wrote and setup automatic test suites via Github Actions workflow as quality assurance
- Self-host with continuous deployment via GitHub, managing production and development environments with separate bot tokens and server configurations

KEY SKILLS

- **Collaboration and Communication**: Co-designed a membership program with a startup founder, translating business goals into a technical solution; coordinated tasks and communication across cross-functional university teams
- **Problem Solving**: Improved program efficiency by 20% through debugging and optimisation in a university project; diagnosed and resolved layout, rendering, and performance issues across a live company website
- **Time Management**: Balanced managing two live production platforms, delivering the membership program, and front desk duties concurrently alongside full-time university coursework
- **Adaptable and Fast Learner**: Consistently picked up new tools as needed, independently implemented Shopify Liquid, Firebase, Airtable, Postgresql/Supabase, FastAPI during the internship

TECHNICAL SKILLS

- **Languages**: Python | Java | JavaScript | SQL | HTML & CSS | C | Prolog | Haskell
- **Frameworks & Libraries**: React | FastAPI | pytest | Shopify Liquid | Pandas
- **Tools & Platforms**: Git & GitHub | SSH | Docker | Supabase (PostgreSQL) | Firebase | Airtable
- **Software Development**: Hands-on experience in OOP, declarative programming, software design, and data structures & algorithms through university projects and professional work
- **Full-Stack Development**: Built and maintained production websites using React, JavaScript, HTML/CSS, GitHub, and Firebase; customised Shopify storefronts using Liquid templating; CI/CD testing
- **Backend & Database Development**: Built REST APIs with FastAPI and designed relational schemas in PostgreSQL/Supabase, including constraint enforcement, PL/pgSQL functions, and RLS policies
- **Data Analysis**: Experienced in data cleaning, pattern identification, and interpreting results from large datasets through coursework and personal projects

VOLUNTEER AND EXTRA-CURRICULAR ACTIVITY

Volunteer Tutor and Lecturer Aug, 2025 - Now
Girls Programming Network, Melbourne

- Coordinated a classroom of 30+ students over a 9-hour period
- Lectured on fundamental programming concepts, delivering targeted support during class exercises
- Set up equipment and participated in coordination of in-person treasure hunts for 80+ students

Winning Team of Women in AI Hackathon Women in AI Hackathon 2025 May, 2025
Melbourne

- Collaborated with a cross-functional team to deliver a prototype of an AI-based product in under three hours
- Communicated prototyped version to an audience of judges and competitors, winning first prize
